

What is Safe Solution®?

- * A chemical solution designed to increase traction by creating microscopic channels in most hard mineral surfaces
- * Is non-toxic and when combined with the Neutralizer Solution becomes biodegradable.
- * When water or grease puddle on non-porous hard mineral surfaces, you are actually hydroplaning on the film or water or contaminants.
- * After the SAFE SOLUTION treatment system is applied, microscopic channels are created for the water and oils to be disbursed from under foot, allowing you to make contact with the surface at all times.
- * To the naked eye and touch, the surface is virtually unchanged when dry.

Before SAFE SOLUTION®

After SAFE SOLUTION®

SAFE SOLUTION®
